

Accounts Receivable

A successful company needs to manage its cash flow and customer information effectively. TRAVERSE helps you handle credit and collections tasks with less strain on your employees. You can track every aspect of your sales and receivables in a timely manner, and use this vital management information to improve the inflow of cash and make the most of sales trends.

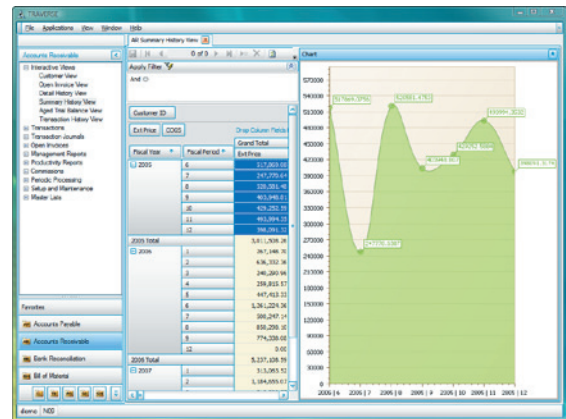

You'll be able to assess your sales position by producing timely reports. Identify your best customers and stay on top of sales patterns. Evaluate your cash discounts program, and spot delinquent accounts early.

Data entry is efficient and flexible with personalized and easy-to-use transaction entry functions. You'll also save time with online invoicing and ready access to associated information.

TRAVERSE Accounts Receivable gives you the flexibility to deliver invoices, statements and packing lists by email or printed document based on the preference of each individual customer. And, if your customers call with questions on their account, you'll be ready to help out using quick lookups filtered by customer or transaction criteria.

Identify specific delivery by fax, email, or printed document for each customer.

Detailed information can be converted to charts, graphs, or pivot tables with the click of a button.

- Group, sort, filter, and modify the layout to view the information the way you want to see it; your filter and grid layout is saved and used the next time you open the form.
- Send invoices, statements and other forms in the format the customer prefers (email, paper, or fax). Print an internal copy of the invoice or statement even though customer copies may have been emailed or faxed.
- Print invoices in the customer currency or the company base currency, based on the customer's preference.
- Configure data entry screens to your own preferences by choosing which fields are visible on the form; use Design Studio to change the order of the fields and to adapt the form to your specific business needs.
- Set up credit card and direct debit payments.

100% Microsoft® Technology - .NET & SQL
